EDUCATION

B.Sc. Software Engineering
Miva Open University
Ongoing | GPA: 5.0 / 5.0

TECHNICAL SKILLS

AI & TOOLS

- LLM API Integration (Anthropic/OpenAI)
- Prompt Engineering
- AI-Accelerated Development
- AI-Powered UI & Chatbots
- Automated Testing via AI
- Git / Version Control
- REST & JSON APIs
- MySQL / PostgreSQL

SOFT SKILLS

- Time Management
- Zero Missed Deadlines
- Client Communication
- Self-Directed Delivery
- Problem Solving
- Agile / Async Workflow

PROFESSIONAL SUMMARY

Full-Stack Developer with **4+ years of hands-on experience** building complete, production-grade web applications independently. Fluent across the entire stack — HTML, CSS, JavaScript, PHP, Python, and Java — with deep expertise in REST API design, database architecture, and modern UI engineering. Actively integrates AI tooling and LLM APIs (Anthropic, OpenAI) into development workflows to accelerate delivery and add intelligent features. Currently maintaining a perfect **5.0 GPA at Miva Open University** while delivering senior-level freelance work. Known for zero missed deadlines, rapid prototyping, and clean, maintainable code.

EXPERIENCE

Full-Stack Developer — Freelance

2021 – Present

Self-Employed / Remote

- Designed, built, and shipped 10+ complete web products across fashion, gaming, business, and education verticals.
- Architected full REST API backends in PHP and Python with MySQL/PostgreSQL serving live client traffic.
- Integrated Anthropic and OpenAI LLM APIs into client products: AI chatbots, smart search, and content generation.
- Maintained a zero missed-deadline record across 4+ years of independent client delivery.
- Managed all project phases solo: scoping, UI design, frontend build, backend, testing, deployment, and client comms.
- Leveraged AI development tools to compress typical 10-day builds into 48-hour MVPs without quality loss.

Frontend Developer

2021 – 2022

Personal & Contract Projects

- Built responsive business websites, portfolio sites, and landing pages with HTML5, CSS3, and vanilla JavaScript.
- Developed reusable component and animation systems that cut per-project frontend time by approximately 40%.

KEY PROJECTS

Steveport v3 — Personal Portfolio

Fully custom portfolio with 5-theme animated video backgrounds, 3D project carousel, skill cross-grid, testimonial slider with live form, and contact section. Pure HTML/CSS/JS + PHP.

IQ-Tester Web Application

Cognitive assessment platform with dynamic question engine, real-time scoring, and personalised result reports. PHP + JS.

AI-Powered Business Website

Corporate site with integrated LLM chatbot (OpenAI API), smart FAQ automation, and contact routing. Reduced client support overhead by 60%.

Gaming Community Platform

Full-stack gaming portal with user authentication, leaderboards, and REST API. Stack: JavaScript, PHP, MySQL.

Fashion E-Commerce Website

Premium fashion brand site with product catalogue, cart, and payment integration. Delivered 40% conversion lift for client.

EDUCATION

B.Sc. Software Engineering (Ongoing)

2023 – Present

Miva Open University — Remote

- Maintaining a perfect GPA of 5.0 / 5.0 while working full-time as a freelance developer.
- Coursework: Data Structures & Algorithms, Software Engineering, Databases, Networking, AI Foundations.
